PROFILE

Enterprise software consultant with 9+ years of experience across customer delivery, enterprise platforms, upgrades, APIs, integrations and automation. Combines technical fluency with cross-functional execution and is building toward AI-first product leadership.

EXPERIENCE

Dassault Systèmes Global Services — Services Software Consultant | 2017–Present

- Enterprise consulting and delivery across 3DEXPERIENCE and DELMIAWorks, including platform upgrades, ERP/MES workflows, APIs, integrations, automation, deployment, testing and customer-facing execution.
- Coordinated a major 3DEXPERIENCE upgrade across five environments in a 13-week delivery window, aligning customer, engineering and R&D; dependencies.
- Worked on an industrial warehouse scanner experience, translating frontline feedback into responsive usability improvements.
- Built AI-assisted tooling for transforming API/Postman information into structured OpenAPI/Swagger documentation.
- Explored workflow automation, local RAG/LLM patterns and AI operations concepts for enterprise use cases.

SELECTED PRODUCT / AI WORK

Enterprise Platform Upgrade: program ownership, release readiness, risk, testing and cross-functional coordination.

Warehouse Scanner Experience: frontline UX, responsive design, user feedback and workflow constraints.

AI-Assisted API Documentation: developer experience, structured generation, OpenAPI/Swagger and validation.

AI & Automation: n8n workflows, private RAG/LLM experiments and incident-intelligence concepts.

CAPABILITIES

Product: discovery, problem framing, user stories, prioritization, UAT, release readiness, feedback loops

AI & Automation: LLMs, RAG, n8n, AI workflows, agent/MCP concepts, AI-assisted documentation

Technical: REST, GraphQL, OpenAPI, SQL, Vue, Node.js, .NET, ERP/MES, enterprise platforms

Leadership: customer communication, stakeholder alignment, cross-functional delivery, risk management, execution ownership

CURRENT DIRECTION

Strengthening AI-first product management across discovery, prioritization, experimentation, metrics and AI product strategy. Targeting AI Product, Technical Product, Product Operations and customer-facing product roles where enterprise depth matters.
